

Description

The smart temperature and humidity detector, designed with low power consumption Zigbee wireless networking technology, has a built-in temperature and humidity sensor, which can sense the slight changes of temperature and humidity in the monitored environment in real time and report them to the APP. It can also link with other intelligent devices to adjust the indoor temperature and humidity, making the home environment more comfortable.

Main Features

- Intelligent Scene Linkage: Works with a smart gateway to link with other home smart devices, enabling automated scene control.
- Comfortable Environment Control: Automatically adjusts air conditioning based on temperature settings via the mobile app, and activates the humidifier in dry conditions to maintain a comfortable living environment.
- Ultra-Low Power Consumption: Designed with ultra-low power technology for energy-efficient operation.
- Long Battery Life: Powered by a CR2450 button battery, offering up to 2 years of use under normal conditions.
- Low Battery Alert: Automatically reports low battery status to the mobile app, reminding users to replace the battery in time.

Specifications

Materials	ABS
Operating Voltage	DC3V
Standby Current	≤20000
Alarm Current	≤20000
Working Temperature	0°C ~ +55°C
Working Humidity	0% RH-95%RH
Wireless Distance	≤100m(open area)
Networking Mode	Matter
Size(mm)	84.7 x 84.7 x 50.7mm

Dimension
